WTO Members issuing maximum number of TBT Notifications in March '14

Notification Details:

The total numbers of TBT notifications issued by the various WTO-member countries in March 2014 were 233. Among these 233 notifications, 79 notifications were addendums that notified adoption of a regulation based on a notification issued earlier.

Product-wise Information: Out of the total 233 notifications, 120 related to food products, 30 related to electrical equipments, 23 related to domestic appliances, 10 related to pharmaceutical products, 8 to plastic related products and the remaining 42 notifications were related to textiles, tobacco, toys, gas containers, cosmetics, chemicals and automobiles. Please note that out of the 233 notifications, in case of nine notifications we found that the link for downloading those notifications were non-functional. We have requested the respective TBT enquiry points to provide us with the details of these notifications. However the TBT enquiry point in their response replied that these notifications are in their respective language and will be uploaded at the WTO as and when the translated version is available.

Country-wise Information: Out of the total 233 notifications, Ecuador issued 32 notifications, followed by Qatar 23, Israel, Saudi Arabia, EU, USA, UAE, Turkey and Mexico with 16, 15, 14, 12, 12, 12 and 12 notifications, respectively. The remaining 85 notifications were from other WTO Member countries.

1	G/TBT/N/CAN/408	5/3/2014	Canada	Pharmaceuticals	The draft regulation deliberates requirements to revise the listing for hydrocortisone on the prescription drug list (PDL). Use of topical hydrocortisone, as the hydrocortisone base or as an acetate salt, at a concentration of .5% as a single ingredient drug product has been a nonprescription product for more than 25 years. Evidence has been assessed by Health Canada that indicates that topical 1% hydrocortisone either as a single medicinal ingredient or when mixed with other nonprescription medicinal ingredients can be safely used in the nonprescription setting. The main concern with increasing the dose hydrocortisone is the possibility of increased systemic absorption which may affect other areas of the body not intended by the topical application. Prescriptio

					n products containing 1% hydrocortisone rarely had adverse reactions reported and none were serious. We have not yet received any response from the stakeholders.
2	G/TBT/N/CAN/400/Add.1	6/3/2014	Canada	Prescription status of medicinal ingredients for human use	The purpose of this addendum is to notify that, Health Canada will revise the listing for minoxidil on the Prescription Drug List (PDL). Only the Human part of the PDL is to be revised; the listing for Veterinary use will remain unchanged. Health Canada has conducted a scientific review of minoxidil against a set of established and publicly available criteria outlined in section C.01.040.3 of the <i>Food and Drug Regulations</i> . The wording remains unchanged from what was proposed in the Notice of Consultation. We have not yet received any response from the stakeholders
3	G/TBT/N/CAN/402/Add.1	6/3/2014	Canada	Prescription status of medicinal ingredients for human use	The regulation deals with the revised listing of diclofenac and minoxidil on the prescription drug list (PDL). Only the human part of the PDL is to be revised. The listing for veterinary use will remain unchanged. We have not yet received any response from the stakeholders.
